PERSONAL PROJECTS

Weather App

- Website made with React using the api at openweathermap.org to find the current and weekly forecast of anywhere. Implemented saved searches using local storage and React state to be able to go back and look at a previous search, even through a reload.
- Demo: <https://eljoey.github.io/weather-2>
- Code: <https://github.com/eljoey/weather-2>

Blog API + Website

- Made a API for personal blogging using Node.js with login auth using Passport.js and JWT. Follows REST practices. Frontend made using React.
- Demo: <https://jh-blog.netlify.com/>
- Frontend: <https://github.com/eljoey/Blog-View-Site>
- Backend: <https://github.com/eljoey/Blog-API>

Message Board

- A message board with user authorization using Bcrypt and session management with Passport. Made using Node JS, Express, Mongoose, Jade, Bootstrap and MongoDB for the database. Messages are viewable to everyone, but only club members are able to see the authors of posts. Showcases use of MVC and REST practices.
